DETAILED ACTION

Election/Restriction

This application contains claims directed to the following patentably distinct species of signaling domains of the claimed invention:

- a) c-kit
- b) gp130
- c) flt-3
- d) EGF receptor
- e) FGF receptor
- f) CSF-1 receptor
- g) G-CSF receptor
- h) thrombopoietin receptor
- I) erythropoietic receptor
- j) growth hormone receptor
- k) prolactin receptor
- l) hepatocyte growth factor receptor
- m) neurotrophin-3 receptor
- n) thyroid hormone T3 receptor
- o) ciliary neurotrophic factor receptor

Art Unit: 1632

The above molecules are patentably distinct in that they have substantially different structures and properties, are expressed by different types of cells, bind to substantially different ligand, and transduce different types of signals. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species from the list of a)-o) above for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-8, 12-28, 32-50, 54-79, and 21-88 are generic.

Applicant is advised that a response to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 1632

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

Any inquiry concerning this communication from the examiner should be directed to Anne Marie S. Beckerleg, Ph.D., whose telephone number is (703) 306-9156. The examiner can be reached Mon-Thurs and every other Friday from 9:30-7:00. If the examiner is not available, the examiner's supervisor, Karen Hauda, can be reached at (703) 305-6608. General inquiries should be directed to the group receptionist whose phone number is (703) 308-0196. The official fax number is (703) 308-4242.
